

**ABSTRACT**

Antisense compounds, compositions and methods are provided for modulating the expression of superoxide  
5 dismutase 1, soluble. The compositions comprise antisense compounds, particularly antisense oligonucleotides, targeted to nucleic acids encoding superoxide dismutase 1, soluble. Methods of using these compounds for modulation of superoxide  
dismutase 1, soluble expression and for treatment of diseases  
10 associated with expression of superoxide dismutase 1, soluble are provided.
